

HAZARDOUS WASTE SATELLITE ACCUMULATION AREA

Ignitable, corrosive, reactive, toxic, and other noxious chemical wastes must be disposed of as directed by the Environmental Compliance / Hazardous Waste Management Unit. EPA and Monroe County regulations prohibit drain disposal, trash disposal, or the intentional evaporation of such wastes. If you have any questions concerning the disposal of chemical wastes, contact the Environmental Compliance / Hazardous Waste Management Unit at 275-2056.

All Hazardous Waste Containers must be:

- Labeled “Hazardous Waste” **and** state the chemicals contained within the bottle. All other labels must be removed or defaced.
- Compatible with the wastes placed into them.
- Kept closed when not actually adding to their contents.
- Placed into secondary containment. Non-compatible wastes must be kept separate. Do not mix wastes. Waste containers may not be located in sinks.
- Clean. Remove chemical residue immediately from the outside of containers.
