Disinfectants and Sterilants

NAME: _____

DATE: ____/____/____

For the True/False questions, place the appropriate answer in the space provided

- ____ 1. Chemical disinfectants and sterilants can present a health hazard to personnel using the material through dermal and inhalation exposures.
- ____ 2. Bleach can't cause any type of hazard to personnel because it is a common material used in many homes.
- ____ 3. To protect the face from splashes when mixing or using disinfectants or sterilants, personnel can wear a face shield.
- ____ 4. Should you have a hand or eye exposure to a disinfectant or sterilant, you should use an eyewash station or a sink to rinse the affected body part off.
- ____ 5. Isopropyl alcohol is flammable and can't be used by a fire or spark source. Also, frequent skin exposures can dehydrate the skin.

Supervisor: A passing score for this quiz is 4 out of 5.
