Created: 4 am EDT Mon 6/23/2025 | Values are maximums over the period beginning at the time shown.

|  | 0,1,1,1                | Maximum heat index values 95° to 104°F expected in the advisory area.  |
|--|------------------------|--|
|  | TIMING                 | Maximum Heat Index Values: between 2 PM and 7 PM.     Heat Advisories in effect Today through Tuesday, with the event's greatest heat index values Today.  |
|  | HAZARD &<br>IMPACTS    | Heat index values will be the highest across inland areas of the Genesee Valley and northern Finger Lakes.     Increased risk of heat exhaustion and heat stroke with prolonged outdoor activity or in non-air conditioned locations, particularly for vulnerable populations.     Overnight temperatures will only drop into the 70s, offering little relief. |
|  | ADDITIONAL INFORMATION | <ul> <li>Record high, and warm minimum temperatures are possible<br/>Today and Tuesday.</li> </ul>   |
|  | POST EVENT<br>OUTLOOK  | <ul> <li>The excessive heat will start to break down by the middle of<br/>this week with more typical summertime conditions with<br/>afternoon thunderstorms.</li> </ul>   |
|  |                        |  |

By 7 AM Tuesday June 24, 2025

OVERVIEW

**NEXT BRIEFING** 

 Hot and humid weather will continue <u>Today and Tuesday</u> for all of Western New York and into the Eastern Lake Ontario

National Weather Service Buffalo, NY
